As remote work has been an expanded practice, many organizations are reviewing how they can best support and plan for use of the remote workplace. Employers can use this checklist when reviewing and planning a remote workstation setup for current employees, or when planning a remote onboarding process. Remote workstation setup can vary by organization, and the employee's role and responsibilities. Employers can review this checklist to determine which components of a remote workstation should be provided to employees and what technology considerations should be planned for.

Workstation Environment and Setup	
Adequate space within the employee's home for an office	
Workstation area that complies with ergonomic and safety guidelines	
Workstation in a location with broadband network able to download and upload at a minimum of 1.5 megabytes per second	
Environment with minimal noise and distractions	
Desk or work area with sufficient space for equipment	
Comfortable and ergonomic office chair	
Computer	
Desktop or laptop, either provided by the employer or employee	
Adequate hard drive capacity and memory on computer to perform necessary job duties	
If video calls will be part of the employee's job responsibilities, computer includes a webcam	
Headset with microphone	
Power cord	
Mouse	
Mouse pad	
Keyboard
